DETAILED ACTION
Election/Restrictions

Claims 1-15, 17-20 remain withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in Paper No. 9.

Claims 1-27 are pending and claims 16, and 21-27 are examined on merits.

Claim Rejections - 35 USC § 112

Claims 16, and 21-27 remain rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Since applicant states on the record that the instant claims are drawn to cancer diagnosis using the autoantibody to CRD-BP, including the limitation of claim 23 (the step relating detection of the autoantibody to what it means) to the base claim would obviate this rejection

Claims 16, and 21-27 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to **use** the invention. In response to the enablement rejection of record, applicant filed Dr. Ross's declaration showing autoantibody to CRD-BP is present in a breast cancer patient. However, Dr. Ross's declaration does not obviate the rejection entirely because the data in the declaration is limited to use autoantibody to CRD-BP for breast cancer diagnosis. The data shown in the declaration is enabled for only breast cancer diagnosis but the claims are drawn to cancer diagnosis in general. Based on the disclosure of the instant specification or the disclosure in the declaration, one in skilled would not conclude or correlate detection of autoantibody to CRD-BP to nasopharyngeal carcinoma, which can be diagnosed by detection of autoantibodies to tubulin as disclosed by Jalbout et al (a copy provided in the previous Office action, 2002, Int. J. Cancer, vol., 101, pages 146-150). The Office maintains that correlating CRD-BP autoantibody detection in a patient's serum to any cancer other than breast

Art Unit: 1642

cancer would require undue experimentation. Limiting the scope of the claims to breast cancer diagnosis would obviate this rejection.

Conclusion

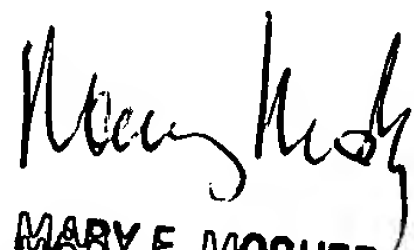

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
